

Cost optimizing modernization & service solutions

For higher plant availability

**Higher production reliability thanks to
a minimized risk of failure**

Resin blending systems

Ecoresinator	Glue / fibre blending system with integrated cleaning automatism
---------------------	--

Forming & press lines

EcoFormer (particleboard)	Modification of the wind formers
EcoScan NEO	Measurement of weight per unit area and tramp material detection
Service Package ContiRoll® 01	Overhaul of chain circulation system (optionally including chain guides)
Service Package ContiRoll® 02	Replacement of insulation on a ContiRoll® press
Service Package ContiRoll® 03	Replacement of friction linings on the outfeed drums
Pressure distribution plates	Retrofitting of pressure distribution plates
Upgrade of electrical system	Upgrade of control-, regulation- and visualization systems
Prod-IQ®	Modularly designed production data management system
HPC-40	High-performance roller rod chain
ContiRoll Ecodrive	Servo motor with two-stage gear unit

Modernization & service solutions for higher plant availability

Finishing lines

Double diagonal saw 20°	Steel beam system and upgrade to the control system
Warehouse vehicles	Modern cable system / modern infrared data transmission / integration of laser distance meters
Double diagonal saw	Replacement of all specified mechanical wear parts
Warehouse management	Conversion of data transmission technology to an optical data transceiver

Küsters & ContiPress®

Roller chain carpet for ContiPress®	Replacement of 1-fold chain with Duroflex 110 and Duroflex 550
Control system ContiPress®	Upgrade to belt and roller chain carpet

Multi-daylight presses

Drive technology	Replacement of drive systems (frequency converters and control electronics)
-------------------------	---

Short-cycle presses

Frames without weld-ons	Same bolt attachments as in ContiRoll® technology
Cylinders with guide and sealing system	Guide and sealing system made of modern plastic materials
