

Cost optimizing modernization & service solutions

For optimal product quality

Increased competitiveness thanks to high-quality products

Resin blending systems

Resin kitchen	Conversion to flow meter
Ecoresinator	Glue / fibre blending system with integrated cleaning automatism

Forming & press lines

EcoFormer (particleboard)	Modification of the wind formers
EcoScan NEO	Measurement of weight per unit area and tramp material detection
ContiBooster®	Mat preheating prior to the pressing process
Pressure distribution plates	Retrofitting of pressure distribution plates
MasterGauge	Automated thickness control
SicoScan	System for measuring of various production parameters
Prod-IQ®	Modularly designed production data management system

Modernization & service solutions for optimal product quality

Finishing lines

SicoCam	Automated inline board measurement
----------------	------------------------------------

Extraction hoods on splitting saws	Modification of the air flow
